ENIYAN S

AERONAUTICAL ENGINEER

eniyansk7@gmail.com | +91 6383762232 | Chennai, India | linkedin.com/in/eniyan-sk | port-iota-sable.vercel.app

PROFESSIONAL SUMMARY

Delivered an AI/NIR-based Industry 4.0 resin-monitoring concept that earned a Letter of Appreciation from L&T Defence, while completing 2 industrial internships (L&T Precision Engineering & Systems, SAIL Salem Steel Plant) as a final-year B.Tech Aeronautical Engineering student (CGPA 8.15). Learned ERP systems, automation and Industry 4.0 tools quickly in 2 very different plants, and presented findings to stakeholders across production, composite manufacturing and quality teams. Seeking a graduate role in process engineering, quality or industrial operations.

EDUCATION

Hindustan Institute of Technology and Science, Chennai **2023 – 2027**

B.Tech, Aeronautical Engineering | CGPA 8.15

Sri Chaitanya Techno School, Salem **2023**

Higher Secondary (Class XII), CBSE

SKILLS

Engineering & Operations: Process Engineering, Quality Assurance, Production Tracking, NCR Closure, Safety & 5S Practices, Cycle Time Observation, ERP Data Validation

Industrial Technology: Industry 4.0, Edge AI, PLC, Industrial Automation

Tools & Core Strengths: ANSYS, SOLIDWORKS, MATLAB, MS Excel, Team Leadership & Training, Cross-Functional Collaboration, Analytical Problem-Solving

WORK EXPERIENCE

Project Management Group – Aero: ***Larsen & Toubro, Precision Engineering & Systems | Coimbatore*** **May 2026 – Jun 2026**

- Tracked production and coordinated quality checks for LCA Tejas wing-component manufacturing, working directly on the shop floor and following production and quality standards.
- Validated ERP data for **~2,000** parts against production records, flagging discrepancies before they delayed the line, cleared all **25 non-conformance (NCR)** parts, including delaminations, surplus parts and left/right wing-part mismatches.
- Collaborated with 3 teams (production, composite manufacturing, quality) to resolve electrical-interface and manufacturing -process issues.
- Presented a real-time NIR and Edge AI resin-monitoring concept to L&T's composite manufacturing department, replacing manual shift-start and shift-end checks.

Engineering Intern: ***Steel Authority of India Limited (SAIL), Salem Steel Plant | Salem*** **May 2025 – Jun 2025**

- Studied plant safety rules and 5S housekeeping practices across 3 stainless steel production operations (hot rolling, cold rolling, heat treatment) in a large-scale plant.
- Observed cycle times and process flow on the production line.
- Supported field inspections and machinery commissioning checks, and followed up on procurement of maintenance parts.

PROJECTS

Resin Intelligence: Edge AI & NIR Closed-Loop Resin Control for Wet Filament Winding ***L&T, Coimbatore***

- Designed an NIR-spectroscopy and Edge AI system to monitor resin-to-fiber ratio in real time and flag process deviations, replacing manual resin-content verification.
- Proposed a PLC-based closed-loop control approach to make corrective process adjustments automatically, targeting lower process variation and more consistent quality.

Slotted Ducted Decelerator: CFD & Experimental Aerodynamic Analysis ***HITS, Chennai***

- Conducted CFD (ANSYS) and experimental analysis to evaluate the aerodynamic performance of re-entry vehicles.

RC Aircraft Design ***IIST, Trivandrum***

Led a team of 5 as captain to design, fabricate and test an RC aircraft, and trained members in aircraft build and manufacturing.

CERTIFICATIONS

- Machine Learning, (***IIT Bhubaneswar)*** **2024**
- MATLAB Onramp **2026**
- ANSYS Structures **2026**

ACHIEVEMENTS

- Earned a Letter of Appreciation from the Head – Programme Management, Aeronautics, L&T (Defence) for Resin Intelligence.
- Placed Runner-Up in a Shark Tank competition for presenting an innovative business solution.
- Placed Runner-Up at a Science Expo for building Piezoelectric Energy-Harvesting Shoes, a sustainable energy solution.
